SKILLS

- Security Operations: Alert Triage, Incident Response, Threat Hunting, IOC Analysis, Security Monitoring, Event Correlation
- SIEM & Log Analysis: Splunk, Elastic Stack (ELK), Sysmon, Windows Event Logs, Kibana
- Network Security & Forensics: Wireshark, Snort IDS, TCP/IP, DNS Analysis, HTTP Analysis, Packet Analysis
- Threat Intelligence: VirusTotal, Cisco Talos, Shodan, Censys, MalwareBazaar
- Malware & Forensics: Volatility 3, Memory Forensics, Malware Classification, Persistence Analysis
- Frameworks: MITRE ATT&CK, Cyber Kill Chain, Unified Kill Chain, Pyramid of Pain
- Programming: Python, React PowerShell, Linux, Windows, Docker, Git, MySQL

WORK EXPERIENCE

RPA and Web Developer

Ryonan Electric Philippines, 2023-present

- Developed and maintained enterprise web applications, automating HR, production, inventory, and approval workflows for 1,000+ employees.
- Built systems that improved operational efficiency, reduced manual processing time by up to 30%, and increased inventory accuracy by 15%.
- Implemented automation and RPA solutions, reducing errors by 25% and saving approximately 10 hours of manual work weekly.
- Designed reporting and monitoring solutions that improved production visibility and accelerated reporting by 40%.
- Administered user access, permissions, and approval workflows across multiple business systems.
- Conducted quarterly cybersecurity awareness orientations for employees, including onboarding security training for new hires.
- Performed phishing email analysis through passive reconnaissance of email addresses, domains, URLs, and attachments to assess potential threats.
- Issued security advisories and user awareness notifications regarding phishing campaigns and suspicious emails to reduce organizational risk.

CYBERSECURITY PROJECTS AND LABORATORY

Tempest – Incident Response Investigation

- Investigated a phishing attack exploiting CVE-2022-30190 (Follina) using Sysmon, network forensics, and persistence analysis.

Boogeyman Campaign Investigations (1–3)

- Analyzed phishing campaigns involving malicious macros, PowerShell execution, credential theft, and memory forensics.

SIEM Alert Investigation & Triage

- Investigated brute-force attacks, malicious activity, and persistence mechanisms using Splunk and Elastic.

Network Traffic Analysis & Threat Detection

- Identified reconnaissance, ARP poisoning, DNS tunneling, and credential exposure through packet analysis.

Data Exfiltration Detection

- Investigated DNS, FTP, HTTP, and ICMP-based data exfiltration techniques. Threat Intelligence & IOC Enrichment
- Performed IP, domain, and hash reputation analysis using threat intelligence platforms.

Intrusion Detection with Snort

- Developed detection rules and analyzed network alerts using Snort IDS.

EDUCATIONAL BACKGROUND

Bachelor of Science in Computer Engineering

Institution: Trimex Colleges

TRAININGS AND SEMINAR

- CompTIA Security+ (SY0-701), 2026
- TryHackMe SOC Analyst Level 1, 2026
- Linux Fundamentals, 2025
- Docker Fundamentals, 2025
- ISO 27001, 2024
- Six Sigma White Belt Certification, 2023
- Web Development Bootcamp, 2023
- Python Essentials 1 and 2, 2023
- Data Privacy Roadshow, 2023
- Electronic Product Assembly and Servicing NC2, 2017
