I'm starting the AWS Networking Series!

Zen Mier

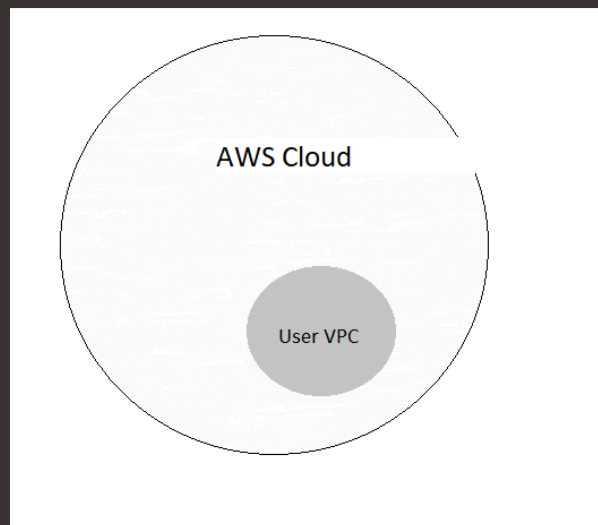

I'm building a cloud networking architecture

i want to learn new things, upskilling. also i want to learn more about cloud and how it works. this can level up me if i learn it

Businesses traditionally had to set up physical servers that will house their system. Cloud networking changed things by efficiency, costs, and accessibility. This way you don't need physical servers.

Excited to share my progress - build a VPC with me!

To stay focused, I will dedicate time each day to working on my networking series. I will track my progress and hold myself accountable for the next 6 months. My goal is to earn my AWS Cloud Practitioner certification by then.

What are networks?

Computer networks are a system that connects devices all over the world. this sends and receives data from one device to another. this system is where devices communicates

What is a VPC?

A VPC is a user's private section in their cloud. This helps organizations by control the traffic in and out of their cloud.
